## Intelligent LED High Bay Fixtures

The cornerstone of Digital Lumens' intelligent high bay fixture portfolio, the DLE family offers unparalleled performance and reliability in a broad range of commercial, industrial, and sporting applications. With market-leading value and efficiency, DLE fixtures are high-performance alternatives for uncontrolled LED, fluorescent, and HID high bay fixtures, and are available in light output versions from 12,000 to 48,000 lumens.

All DLE high bay fixtures feature integrated occupancy and daylight sensors, rotatable light bars, and a variety of optics options to deliver high-quality light and maximum efficiency, flexibility, and control. The only LED high bay with adjustable direct/indirect lighting, DLEs are ideal in manufacturing, sporting, and other applications that require lighting uniformity and distribution across both ceilings and workspaces.

Proven to offer superior performance and efficiency in the world's most demanding customer environments, DLEs are wirelessly networked to LightRules® lighting management software for comprehensive reporting and easy management of lighting system settings. In addition to rugged design and construction, DLE fixtures offer emergency lighting capabilities to enhance employee safety and regulatory compliance, as well as automated life-safety testing and reporting through LightRules software.

### PRODUCT FAMILY FEATURES:

- 12,000, 18,000, 24,000, and 48,000 lumen output versions to provide high-quality light distribution
- Wireless connectivity with LightRules software for easy reporting and fine tuning of lighting settings anytime, anywhere
- Software-defined coordinated control and progressive dimming to maximize occupant comfort and energy savings
- Direct/indirect lighting distribution options for optimal visual comfort
- Narrow, wide, aisle, and diffuse optic options to accommodate a broad range of applications
- Integrated power metering, occupancy, and daylight sensing for maximum efficiency
- Emergency battery-backup accessory with reliable operation and automated testing for enhanced safety

## DLE FIXTURE ORDERING INFORMATION

The tables below provide guidelines for encoding item numbers when ordering DLE fixtures. Select a fixture type (lumen output), voltage, optic, and CRI/CCT, and then use the character codes (in bold) when ordering.

**Note:** CRI/CCT codes ending in 1 or 2 indicate a fixture that is compatible with BBD43 (battery backup).

**Note:** For short/standard leadtimes, select options in **bold**.

<sup>1</sup> ⚠️ Clean with mild soap and water only.

⚠️ Maintain 10 ft (3 m) setback from walls open to exterior.

<sup>2</sup> Calculated in nominal application environment.

<sup>3</sup> Per LM-79-08 test methods.

<sup>4</sup> Projected based on TM-21 data. L70 = Time to 70% lumen maintenance. For details, refer to the Statement of Lumen Maintenance.

<sup>5</sup> Requires DDWPL (DLE Direct Wiring Plug). Refer to the DLE Installation Instructions for more information.

<sup>6</sup> Fixtures with Wide or Diffuse optics, as well as all DLE-48 fixtures ship without sensor masks.

<sup>7</sup> Requires BBD43-compatible fixtures. DLE-48 requires two (2x) BBD43 units per fixture. Refer to individual product specifications for details.

<sup>8</sup> High Voltage fixtures (HV) available in North America only.

<sup>9</sup> Nominal CCT, as defined by ANSI C78.377-2008.

<sup>10</sup> Efficacy values vary with optic option. See DLC QPL for variant details.

<sup>11</sup> Input ratings may vary for international certifications.

<sup>12</sup> Note that Daylight Harvesting is not operable by a fixture with Diffuse optics.
